RESOURCE MOBILISATION AND OPTIMAL UTILIZATION POLICY

Resource planning refers to the strategy for planned and judicious utilisation of resources in SRDCH. It is essential to have resource planning because of the following reasons:

1. It helps to identify the various resources present in different sectors of dental college.
2. It helps in the conservation of various non-renewable resources.
3. It helps in reducing wastage of resources.

Resource optimization is the set of processes and methods to match the available resources (human and non-human) with the needs of the organization in order to achieve established goals.

The purpose of resource optimization is to find an alternative with the most cost effective or highest achievable performance under the given constraints, by maximizing desired factors and minimizing undesired ones in teaching and treating patients in various departments in the college. Resource maximization is the way of attaining the highest or maximum result or outcome regard to cost or expense.

Human resources in SRDCH are teaching staffs and non-teaching staffs like office staff, nursing staff, dental hygienist, dental mechanic, electrician, librarian, attenders, gardener, receptionist, medical records section staff, photographer, main store in-charge, canteen staff, hostel staff, pharmacy staff and housekeeping staff. Resource of money in SRCDH are student fee, hostel fee, course fee, conference fee, continuing dental education programs, library photocopying, pharmacy medicine, satellite clinics and patient treatment charges.

Resource of money is utilised by paying salary to all teaching and non-teaching staff, purchasing dental chair, various equipment and instruments, dental materials, books, journals and medicine for the pharmacy and computers an various software like LMS, DMS.

Resource optimization is done by preserving and maintaining the dental chairs, various equipment and instruments. Established of satellite clinics is one-time investments which has been utilised to optimize the income to the dental college.

To conduct various faculty development programs and various co-curricular courses some of the teaching faculties have been trained and will be giving training to many other faculties which is going to be a part of optimization of money resources for the institution.

Thus resource planning and optimization provides excellent evidence-based oral health education that prepares competent, ethical, and compassionate dental practitioners to meet the oral healthcare needs of community today and in the future.

Resource optimization enables to provide excellent patient-centred, collaborative, comprehensive oral healthcare access in various departments and satellite clinics, improving healthcare access to underserved communities. Expansion of existing clinical services to support the educational and clinical research mission and enhanced access to general and specialised oral health care is one of the important goals of SRDCH.

Good administration and support is required to improve annual planning and decision making for enhanced budget preparation.

External relation and community outreach programs develop stronger relationship with the professional, business, social, and political networks to enhance the reputation of SRDCH, as a community asset and helps in optimization of resources as well. Resource planning is done to promote a humanistic environment that supports diversity and cultural competency through enhanced communication and engagement.
